We looked at whole school indicator for each of the areas. Look over columns and monitoring expectations and criterion based assessments.

Data team members need to look at the IB units' google forms to see what teachers are discussing and talking about in terms unit planning. IB is all about being collaborative.

School culture: PBS seeing how many stamps are given out by teachers on a weekly basis. Shout out links to create a positive school culture.

The data team members broke into different groups looking at three different IB units (math, science and social studies)
